CARMEN NAVARRO TIMÓN

I am a designer who knows how to code and loves it.
I qualified as a Higher Technician in Multiplatform Application Development in December 2020. I have been trained as a fullstack and I am specialised in **frontend**.
I come from the world of design applied to the cultural and artistic sector. I have worked as a freelancer and also in large teams in museums, theatres, TV and cinema.
In order to direct towards the digital sector everything I have learnt during these years of experience in design, I have taken several professional courses in Product Design, Interaction Design and **UX/UI Design**.
I am passionate about the technological universe for its enormous potential both in its capacity to increase people's cognitive abilities and its power to generate new experiences, transmit new sensations and emotions.
